

MASTERS[®]

A-PLUS[®]

Anaerobic Pipe Thread Sealant

MASTERS[®] A-PLUS[®] is a general purpose anaerobic pipe thread sealant. It has superior sealing and locking properties compared to tapes and non-hardening pastes.

MASTERS[®] A-PLUS[®] seals to moderate pressure almost instantly and to 250 psi in approximately 24 hours. Once curing is complete, it can withstand temperatures from -65°F to 400°F (-54°C to 204°C).

MASTERS[®] A-PLUS[®] is known for its excellent performance on stainless steel pipe and is commonly used where vibrations are prevalent, making it suitable for production line applications.

It lubricates during assembly and hardens in the threads.

Contact us for specific chemical compatibility.

Directions:

- Make sure threads are clean.
- Apply a bead around male threads, leaving the first thread free.
- Tighten fittings properly using a wrench.
- Allow 24 hours minimum in ambient temperature to cure for maximum pressure and chemical resistance.

Listed by Underwriters' Laboratories of Canada and the U.S.

MASTERS[®] A-PLUS[®] is not recommended for use on Oxygen systems or Plastic Pipe.
We recommend **Masters[®] Orange T-Tape**.

Note: Pipe 2" and larger, as well as low temperatures, considerably affect the products ability to cure quickly.
