

INDUSTRIAL TAPE

THOMPSONS™ INDUSTRIAL TAPE seals all metal and plastic threaded connections against leakage at commonly used temperatures and pressures.

THOMPSONS™ INDUSTRIAL TAPE is non-corrosive, non-flammable, clean, and easy to use. Joints disassemble easily, even after years of service.

Because it is chemically inert, **THOMPSONS™ INDUSTRIAL TAPE** is impervious to virtually all chemicals and gases.

Directions:

- Make sure threads are clean and remove any shreds of previously applied tape.
- Beginning with the first thread of the male end, wrap tape in the direction of the thread spiral. Use enough for a good seal.
- Tighten the joint using a wrench.
